**COLLECTION
OVERVIEW**

RICE FIELD

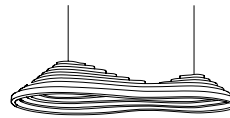

RF 240

RF 120

RF 180

RF 90

The Rice Field series consist of two models in two different sizes.

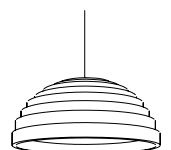

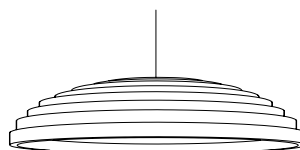

Inspired by the shape of rice fields, the organic outline of the layers create a sheltered atmosphere coherent with its acoustic efficacy. By extruding the flat surface of the acoustic melamine foam, the luminaire's volume is increased, improving its acoustic effectiveness.

CONVEX

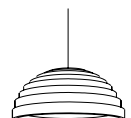

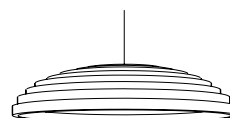

Convex Oval 240

Convex Dome 120

Convex Oval 180

Convex Dome 90

The Convex series consists of two models in two different sizes. Due to their familiar shape, these luminaires require little introduction. The symmetrical character and subtle interplay of lines create a serene light silhouette. The combination of volume, shape and mass make the luminaires to provide a sheltered feeling.

ROUND & ROUND

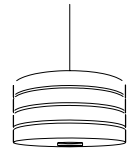

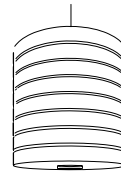

R&R 120XL

R&R 120

R&R 90XL

R&R 90

The Round&Round series consists of one model, available in four sizes. Due to the large body of melamine foam, these are the most effective luminaires in our collection.

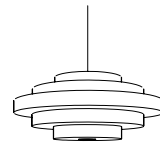

Despite its volume and size, the layering of the Round&Round series creates an open structure through which light subtly finds its way. In addition to its straight forward aesthetics, this structure increases the surface of the luminaire, and therefore its sound absorbing capacity.

RETRO

Retro 120

Retro 90

The Retro series is available in two sizes and refers to the well-known lantern. Despite the relatively large volume, the design does not appear monumental.

Thanks to the centered polycarbonat tube being covered all around with melamine foam, this model generates a fairly compact and fully downward directed light beam.
